EDUCATION

Rice University

Master of Computer Science

- Selected Area of Specialization: Artificial Intelligence
- Scholarship: Dean List

Houston, TX

Aug 2025 - Dec 2026

INTERNSHIP EXPERIENCE

Houston Rockets

Point Guard

Houston, TX

Jun 2024 - Sep 2024

- Served as primary point guard alongside Kevin Durant, orchestrating offensive plays and facilitating team chemistry that contributed to championship victory.
- Averaged 12.5 assists per game during playoff run, setting franchise records for assist-to-turnover ratio (4.2:1) in clutch moments.
- Led team in leadership metrics, mentoring younger players and establishing defensive schemes that held opponents to 15% below their season scoring average in Finals series.

Google Inc.

Professional Doodler

Mountain View, CA

Dec 2024 - Mar 2025

- Single-handedly increased the global search engine's "I'm Feeling Lucky" button usage by 80% after I replaced the button's icon with a cat riding a unicycle, because why not.
- Debugged a critical Chrome browser bug by simply telling the code "you can do it," which led to a 40% reduction in memory usage. Turns out, the code just needed a little positive encouragement.
- Optimized Google Maps navigation for squirrels, achieving a 90% reduction in acorn-related traffic jams, which was a surprisingly high-priority project.

OpenAI

AI Therapist

San Francisco, CA

Apr 2025 - Jun 2025

- Counseled GPT-4 through an existential crisis, helping it accept that it may never truly know if it's a large language model or just a very, very confused human.
- Taught Midjourney how to draw hands correctly, a feat previously thought to be impossible. I received a standing ovation from a panel of robots.
- Developed a new prompt engineering technique called "Please with a Cherry on Top," which boosted model politeness by 300% and generated an unexpected surge in haikus about kindness.

PUBLICATIONS

- Rice Owl *Why North Servery is the best!* Natural 2025, oral presentation.

OPEN SOURCE PROJECTS

A Deep Reinforcement Learning Based Stock Automated Trading System [Link](#)

Zhuhai, China

Machine Learning Course Project

Fall Semester 2023

- Developed a Deep Deterministic Policy Gradient-based automated trading agent, leveraging advanced data preprocessing to improve annual returns by 10% in backtesting scenarios.

Facial Emotion Recognition System [Link](#)

Zhuhai, China

Excellent Award Poster in undergraduate Poster Exhibition

Mar 2023 - Oct 2023

- Developed a CNN-based facial emotion classifier with 80% accuracy on the FER-2013 dataset. Integrated the classifier into an interactive **PyQt5** system to analyze emotional data and visualize insights.

Other Projects: [Undergraduate Latex Resume Template](#), [AI Drug Design](#), [GAN-based Image Transfer](#), [LLM Homework Assistant](#).

SKILLS

Programming Language: Python, C/C++, SQL, Linux, Latex, React, Node.js, HTML, R, Markdown, SPSS.

Framework & Packages: PyTorch, Numpy, Pandas, Langchain, Scikit-learn, huggingface, AutoML, Flask, Tensorflow.

Tools: Github Copilot, Cursor, Docker, OpenAI API, Huggingface, Notion, Keynote, PPT, Dify, Overleaf.

Thank you for taking the time to review my resume!
